First Announcement of the 5th ARADOS Meeting

ARADOS (Asian Radiation Dosimetry Group) chaired by Dr. Osamu Kurihara from QST-NIRS, Japan was founded in 2015 as a research platform of radiation dosimetry among Asian countries. Our main missions are (1) enhancement and harmonization of radiation dosimetry capabilities in Asian countries, (2) exchange of the technology and activities on radiation dosimetry of each member of participating institutes, and (3) preparation of the joint response of radiation dosimetry services in radiological/nuclear events. As of now more than 10 research institutes from Asian countries have joined the 4 working groups (external dosimetry, internal dosimetry, biological dosimetry, and computational dosimetry) under the ARADOS.

We are very pleased to invite research scientists, technical staffs and professionals interested in radiation dosimetry to the 5th ARADOS meeting held in Beijing, China.

Information of the 5th ARADOS Meeting

Program: Presentation sessions (day 1), WG meetings (day 2) and Site visit (day 3)

Dates: 6th – 8th November, 2019

Venue: Beijing, China

Contact: Qing-Jie Liu (liuqingjie@nirp.chinacdc.cn)
